

## Automatic Power Factor Correction system with detuning chokes 134 Hz (p=14%)

Code	TLFR52250/1							
Rated voltage	400 ÷ 415 V							
Frequency	50 Hz	Vmax	24h	8h	30m	15m	5m	1m
Capacitors Voltage	525 V	Imax	525	580	600		630	680
Capacitors Voltage max	580 V		2In		3In	4In		10 In
THDi max	100 %							
THDv max	< 5 %							
Power @ 400 V	250 kvar							
Power @ 415 V	269 kvar							
Rated current	361 A							
Banks (400 V)	50-50-50-50-50							
Steps	5 x 50 kVA <sub>r</sub>							
Typology of Capacitors	MKP525R							
PFC Controller	PCRL7							
Switch Disconnecter	3x500 A (Icc 20 kA)							
Input of cables	Bottom							
Dimensions (WxHxD)	800*1730*600 mm							
Weight	343 Kg							
Temperature class (PFC unit)	-25 / +65°C							
Insulation voltage (PFC Unit)	690 V							
Max overload (PFC unit)	1,3 In							
Total losses (PFC unit)	< 2 W/kvar							
Reference standards (PFC unit)	EN61921, EN61439-1							

### Technical Features

**Capacitors** Three-phase metallized polypropylene Capacitors with Resin insulation, MKP525R Series, Rated Voltage 525 V, Insulation Voltage 690 V, equipped with discharge resistors, overpressure safety device and IP20 terminals. Dielectric losses < 0,2W/kVA<sub>r</sub>. Reference Standards IEC60831-1/2, UL N.810, CSA

**Detuning Chokes** made of copper/aluminum sheet oriented crystals, placed in series between the contactor and the capacitor bank, with the following features: linearity 1.8 Ip/In, realized in class H, over temperature range: 60°C, complete with thermal probe for switching off Capacitors Banks in case of overtemperature, limit the peak current inrush capacitors, detuning frequency 134 Hz (p=14%), standard for 3<sup>rd</sup> Harmonic

**Three-Pole Contactors** for capacitor banks, with high number of insertions (>250.000)

– 3-pole mains and 1 built-in auxiliary contact

– block for serial insertion in the circuit of 3 resistors that limit the peak current at the excitation of the condenser battery. Reference standards IEC 60947-1 / 60947-4-1 and EN 60947-1 / 60947-4-1

**Automatic PFC Microprocessor Controller** PCRL Series, completed with backlit multilingual LCD Display in 6 languages (Ita, Eng, Deu, Fra, Esp, Por), with the following features: Operation on 4 Quadrants for cogeneration systems, Automatic Recognition of the direction of the current, RMS Voltage and Current, Uniform the use of each Bank / Status of each Bank / Weekly Power Factor, Capacitors overload, Overtemperature, Network THD, AUT / MAN, Protection for overcurrent, overvoltage and overtemperature and micro-interruptions, Setting of Maintenance Program/Advise by month/year

**Sheet-steel enclosure** 15 and 20/10, painted with epoxy dust paint, colour RAL7035 (others on request). Connection through power cables FS17 (CEI EN 50575, CEI UNEL 35716, CEI EN 50525 and CPR UE305/11). Internal setting in Modular Racks connected through aluminium busbar system (**Type Tested KEMA ref. 5189-16 Icw 50 kA for 1 sec.**). Protection degree IP30 external (IP54 on request)I, IP00 internal (IP20 with open doors on live parts)

**Three-pole Switch Disconnecter** with door interlock, sized 1,5 time the nominal current of PFC Unit as per EN61921

**NH00 Fuses** 100 kA for the protection of each capacitor bank. Auxiliary circuits are protected through 10,3 x 38 Fuses

**Single phase transformer** for separating the power circuit from the auxiliary circuit (220 Vac, others on request).

**Ventilation** Forced with Fan + Thermostat connected with PFC Controller for alarm signal and switch off contactors in case of overtemperature (natural operation up to 35°C; forced ventilation from 35°; with a temperature of 50°, the PFC will be switched off)
